

# a quantum LEAP FORWARD

in canine OA pain management

At Exubrion Therapeutics,  
**OUR VISION IS TO FOREVER IMPROVE**  
the compassionate care of companion animals

Our name, Exubrion, emerged from the word “exuberance,” which is the quality of being full of energy and excitement.

- Speaks to our determination to help animals live healthy, active, pain-free lives
- Defines our enthusiasm for supporting the veterinarians who care for pets with innovative new therapies, specifically in canine osteoarthritis (OA)

We understand the debilitating nature of OA and are working to help families continue to share joyful interactions with their pets with groundbreaking, science-based solutions that:<sup>1,2</sup>

- Reduce pain and inflammation
- Break the vicious cycle of degenerative joint disease
- Help restore the active lives of companion animals

**Our goal is to ensure both veterinarians and pet parents have  
an effective option to alleviate OA pain and inflammation**

Utilizes innovative,  
breakthrough technology

Addresses one of the most  
significant areas of unmet need  
in veterinary medicine

Provides a solution specifically  
developed and extensively  
studied for use in dogs

We see Tin-117m as a platform therapy with the potential to treat not only arthritis but also other medical conditions in a variety of species.

### Our proprietary conversion electron therapy—Tin-117m

- The potential to give animals with OA an improved quality of life<sup>1</sup>
- An opportunity to improve the current treatment options for the progressive and debilitating disease of OA<sup>1</sup>

### Our initial product, Synovetin OA®—for canine elbow OA

- The ability to intervene in the inflammation/pain cycle of OA<sup>2</sup>
- The treatment confidence of 1 minimally-invasive intra-articular injection that delivers up to **1 full year of response**<sup>1</sup>

## we are driven to help pets, their families, and their veterinarians

#### ***Our commitment to pets***

Do more for dogs with unresolved pain to help improve their ability to run, jump, and play.

#### ***Our commitment to pet parents***

Help people better care for beloved canine family members without the need for daily medications, multiple injections, or lengthy rehabilitation.

#### ***Our commitment to veterinarians***

Support surgeons in more confidently alleviating the pain of OA and improving the active lives of dogs.
